INTERNSHIP

◆ CELEBAL TECHNOLOGIES

Intern as Backend Engineer in Node.js Domain
May - July 2023 (2 Months)

PROJECTS

◆ WEATHER MONITORING WEBAPP

My First Ever Web Application Using APIs and Bootstrap. I learned a lot while making this project with JavaScript. It fetch weather details of specific city and display on client side.

◆ HOTEL ROOM BOOKING WEBAPP

I developed a FullStack web application utilizing the MERN Stack which offered a valuable opportunity to expand my expertise in Node.js and MongoDB. With its diverse functionalities, including room booking to receipt generation, and seamless integration of a payment gateway, I gained a good knowledge and valuable experience.

◆ WINDOWS 11 CLONE

It is a frontend project entirely made from scratch with HTML, CSS & Vanilla JavaScript only. I learned more about designing part while working on this, its a full replica of new windows 11 with night theme, camera app, notepad and etc.

◆ E-BANKING WEBSITE (Group Project)

A full stack website using JAVA Servlet as backend and SQL for database and HTML & CSS for frontend, also I learn using Apache Tomcat Server.
